

Lab and Homework

Some information on the Lab and Homework.

- Every week there will be a Lab and Homework assignment. The deadline is approximately one week later, the exact deadline can be found on Canvas.
- Homework assignments have to be submitted as a PDF file and the Lab assignments as a Python notebook.
- You have to work in groups of 3 students on the Lab and Homework assignments and submit as a group. Therefore you have to sign-up in one of the ML1 groups (under the People tab).
- In principle we don't allow groups of 1 person due to the large number of students taking the course. This implies that we will merge groups of 1 student in the second week of the course.
- Each week two lab sessions are scheduled, one on Thursday morning and one on Thursday afternoon. These sessions are not mandatory, and you can only attend one of these sessions. The purpose of having two sessions is to allow you to avoid clashes with other courses.
