

Homework 1

HAND IN PROCEDURE:

- Via Canvas
- In teams of 2. Indicate all your group members on your copy

Come up with a vacation (specific enough to identify risks). Come up with 5 risks to this vacation, and rate them in probability and impact; put this in a 2D-chart. For each of these risks, suggest a possible strategy (including doing nothing, if you feel that that is justified). Make sure you cover all four Ts, and mention which strategy corresponds to which one. Also put the effect of these strategies in the chart.

This homework should not take you more than 1 page A4.
